

REGIONALLY SIGNIFICANT PROJECTS

Determinations of regional significance are made on a project-by-project basis by the Skagit Council of Governments, consistent with federal requirements. A project can only be considered Regionally Significant in Skagit 2045 if that project is on the regional transportation system, or includes a proposed expansion of the system. Projects that are not part of the regional transportation system are not considered Regionally Significant. Projects that are Regionally Significant must be included in Skagit 2045 prior to being programmed in the Regional Transportation Improvement Program.

The following categories classify Regionally Significant projects as **Roadway**, **Non-motorized**, **Transit**, **Ferry**, **Intelligent Transportation Systems**, and **Planning and Corridor Studies**. Examples of projects that are Regionally Significant, and projects that are not Regionally Significant, are included within each category.

ROADWAY: CAPACITY EXPANSION PROJECTS ON THE REGIONAL ROADWAY SYSTEM

Examples of projects that are Regionally Significant:

- New roadway;
- Added travel lane for the length of roadway between at least two modeled intersections;
- Continuous two-way left turn lane from one modeled intersection to another;
- Multi-lane roundabout;
- Street realignment or relocation;
- New interchange or reconstruction of interchange, including addition of new turning movement;
- New managed lane or converted managed lane (e.g., high-occupancy vehicle lane, express toll lane);
- Interstate and state route acceleration, deceleration or climbing lane; and
- Grade separation.

Examples of projects that are not Regionally Significant:

- Lane widening (e.g., 10 ft. to 12 ft.);
- Reconstruction, maintenance or preservation project that does not add modeled capacity;
- Safety project that does not add modeled capacity;
- Environmental project that does not add modeled capacity; and
- Project that upgrades facility to different standard that is not modeled (e.g., major collector to minor arterial upgrade).

NONMOTORIZED: SHARED USE PATHS AND BICYCLE LANES ON THE REGIONAL NON-MOTORIZED SYSTEM

Examples of projects that are Regionally Significant:

- New shared use path separated from a roadway;

- Added capacity to an existing shared use path, excluding path improvements (e.g., dirt to gravel, or gravel to asphalt); and
- Adding designated bicycle lane to a roadway on the regional non-motorized system.

Examples of projects that are not Regionally Significant:

- Other than a bicycle lane on the regional non-motorized system, any project within roadway right of way or adjacent to a roadway, except where a shared use path is part of the regional non-motorized system and shares right of way with a roadway.
- Sidewalk or walkway project that does not include a shared use path;
- Bike sharrow or bike box; and
- Shared use path improvements (e.g., dirt to gravel, or gravel to asphalt).

TRANSIT: CAPACITY EXPANSION PROJECTS

Examples of projects that are Regionally Significant:

- New park-and-ride lot with 50 or more stalls;
- New or proposed transit center, station or maintenance-operation base;
- Dedicated transit right of way; and
- Bus purchase that expands fleet capacity.

Examples of projects that are not Regionally Significant:

- Transportation Demand Management project (e.g., ridesharing/vanpooling);
- New bus route or service increase;
- Replacement bus purchase that does not expand fleet capacity; and
- Bus flyer stop.

FERRY: VESSEL ADDITIONS AND REPLACEMENTS; TERMINALS THAT ARE NEW, RELOCATED, OR REPLACED WITH ADDED CAPACITY

Examples of projects that are Regionally Significant:

- Additional vessel, not including seasonal service change;
- Vessel replacement;
- New or relocated terminal;
- New parking facilities with 50 or more stalls; and
- Terminal replacement that adds capacity.

Examples of projects that are not Regionally Significant:

- Change to existing ferry service; and
- Preservation and maintenance of existing vessel or terminal.

PLANNING AND CORRIDOR STUDIES: PLANNING AND CORRIDOR STUDIES AND THAT ARE PART OF A BROADER PROJECT CLASSIFIED AS REGIONALLY SIGNIFICANT

Examples of projects that are Regionally Significant:

- Planning or corridor study that is part of a broader project with an anticipated future phase(s) (e.g., preliminary engineering, right of way, construction) may be Regionally Significant if the project meets applicable criteria in other Regionally Significant categories.

Examples of projects that are not Regionally Significant:

- Planning or corridor study that is a stand-alone project without any anticipated future phase.

INTELLIGENT TRANSPORTATION SYSTEMS: INTELLIGENT TRANSPORTATION SYSTEMS PROJECTS WITH AN ESTIMATED COST OF \$10 MILLION AND OVER

Examples of projects that are Regionally Significant:

- Intelligent Transportation Systems projects with an estimated cost of \$10 million and over.

Examples of projects that are not Regionally Significant:

- Intelligent Transportation Systems projects with an estimated cost under \$10 million.

SR 20 Spur (Ferry Terminal to G Ave) Sidewalk Improvements

ID Number: 23

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Anacortes		
Project Description			
Full widening, bike lanes and sidewalks. This project requires coordination with WSDOT.			
Project Limits	Ferry Terminal to G Avenue		
Mode Type	Non-Motorized		
Estimated Year of Completion	2031	2021 Estimated Cost (in millions)	\$5.7
RTP Status	Planned

Relative Priority: Medium

Blackburn Road Extension

ID Number: 28

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Mount Vernon		
Project Description			
Blackburn Road transitions to a 22-foot wide road with no striping east of Little Mountain Road. Part of the conditions of approval for the Egglemont development is to improve and extend this road (new construction) to Egglemont Drive and establish a southerly connection to the southerly street network.			
Project Limits	Little Mountain Rd to Waugh Rd		
Mode Type	Roadway		
Estimated Year of Completion	2027	2021 Estimated Cost (in millions)	\$3.7
RTP Status	Planned		

Regional Priorities

Economic Vitality Preservation Safety Mobility Environment Stewardship

- =Addresses regional priority
- ◐ =Partially addresses regional priority

Relative Priority: High

Martin Road Improvements

ID Number: 27

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Mount Vernon		
Project Description			
This section of Martin Road is a very narrow, 20 footwide, remnant of the original county road. Several years ago a 5 foot wide asphalt path was installed on the west side of the road for pedestrians. Improvements will include widening the road to include a 3 foot paved shoulder on the east side, 11 foot lanes, and converting the existing path to a 10 foot wide, paved, shared use path on the east side.			
Project Limits	Hoag Road to Sigmar Lane		
Mode Type	Non-Motorized		
Estimated Year of Completion	2026	2021 Estimated Cost (in millions)	\$1.6
RTP Status	Planned		

Regional Priorities

Economic Vitality Preservation Safety Mobility Environment Stewardship

Kincaid Street Corridor Improvements

ID Number: 61

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Mount Vernon		
Project Description			
This arterial is the gateway to downtown Mount Vernon providing access to Interstate 5, regional transit and rail service, and the South Kincaid Subarea Plan. Current planned improvements include a multi-modal complete streets design and roundabouts at 3rd Street and both Interstate 5 ramp locations, as well as railroad crossing enhancements. This project requires coordination with WSDOT.			
Project Limits	Hoag Road to Sigmar Lane		
Mode Type	Roadway		
Estimated Year of Completion	2026	2021 Estimated Cost (in millions)	\$10.0
RTP Status	Illustrative		

Regional Priorities

Economic Vitality	Preservation	Safety	Mobility	Environment	Stewardship
-------------------	--------------	--------	----------	-------------	-------------

Relative Priority: Medium

Replacement of Division Street Bridge

ID Number: 67

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Mount Vernon		
Project Description			
Replacement of WSDOT's existing bridge. A Division Street (SR 536) bridge study is identified to help determine the feasibility of replacing the bridge structure and requires the coordinated development of Practical Solutions with WSDOT.			
Project Limits	First St to Wall St		
Mode Type	Roadway		
Estimated Year of Completion	2045	2021 Estimated Cost (in millions)	\$20.0
RTP Status	Illustrative

Relative Priority: Medium

Skagit River Pedestrian Bridge

ID Number: 62

0 0.25 0.5 1 Miles

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Mount Vernon		
Project Description			
<p>The Skagit River Bridge has a minimal sidewalk on one side and no separated bike lanes; sharing 12-foot lanes with traffic. The concept is to develop a separate 10-foot structure across the Skagit River to accommodate both pedestrian and bicycle traffic across the river. A Division Street (SR 536) bridge study is identified to help determine the feasibility of constructing a separate structure or other feasible crossing alternatives. Projects on state highways require the coordinated development of Practical Solutions with WSDOT.</p>			
Project Limits	Riverwalk Trail to Ball Street		
Mode Type	Non-Motorized		
Estimated Year of Completion	2028	2021 Estimated Cost (in millions)	\$14.4

Bicycle Route 13 (Centennial Trail) Corridor Study

ID Number: 49

Sources: Esri, HERE, Garmin, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), (c) OpenStreetMap contributors, and the GIS User Community

*Mapped project locations are approximate

Project Sponsor:	Skagit County		
Project Description			
This is an existing north/south multimodal transportation corridor from the southern Skagit County Line to the northern Skagit County Line, adjacent or parallel to State Route 9 and Skagit County roads. The proposed project envisions a 10-foot paved trail and a grass shoulder for equestrian use, consistent with the Snohomish County trail sections. The corridor study would consider issues including available right of way, property impacts, shoulder widths and alignment. Coordination with Snohomish and Whatcom counties would also be appropriate to link to their facilities. This study requires coordination with WSDOT and Sedro-Woolley.			
Project Limits	State Route 9 and County Roads		
Mode Type	Planning & Corridor Studies		
Estimated Year of Completion	2026	2021 Estimated Cost (in millions)	\$0.2
RTP Status	Planned		

Regional Priorities

Economic Vitality Preservation Safety Mobility Environment Stewardship

Project Sponsor:	Skagit County		
Project Description			
This is an existing north / south multimodal transportation corridor from the Southern County Line north to Bay View State Park which passes through the Town of La Conner and Bay View, utilizing Skagit County roads and the existing Padilla Bay Trail. The projects would include paved shoulder widening, trail improvements and signing along the corridor. Connects or will ultimately connect to bicycle routes in Whatcom and Snohomish counties. This study requires coordination with WSDOT.			
Project Limits	Southern County line to Bayview State Park		
Mode Type	Planning & Corridor Studies		
Estimated Year of Completion	2025	2021 Estimated Cost (in millions)	\$0.2
RTP Status	Planned
