### **Key Peninsula Go! electric carshare launch party**

Last Friday, [KPGO!](#), the newest Zero-emissions Access Program-funded electric carshare, held its launch party. KPGO! is the first EV carshare on the Key Peninsula and expands the availability of EV carshares in communities across Washington. With KPGO!, folks and local nonprofits on the Key Peninsula can reserve a clean, zero-emissions vehicle. What's more, KPGO! strategically located the charging station for the carshare near a stop for Pierce County's [Peninsula Transit](#). Now that's partnership and planning that helps make sure everyone can get where they need to go!
